## Company Introduction

## About Armatura

Armatura is a leading provider of advanced biometric solutions that bridge the gap between the physical and digital worlds. We are dedicated to delivering innovative, secure, and accurate identity authentication and access management systems to our clients worldwide. Our diverse clientele includes systems integrators, security providers, government agencies, and multinational corporations.

Our team consists of talented professionals with deep expertise in the fields of biometrics, artificial intelligence, deep learning, and computer vision. We are driven by a passion for innovation, a commitment to excellence, and a belief in the transformative power of technology to improve lives.

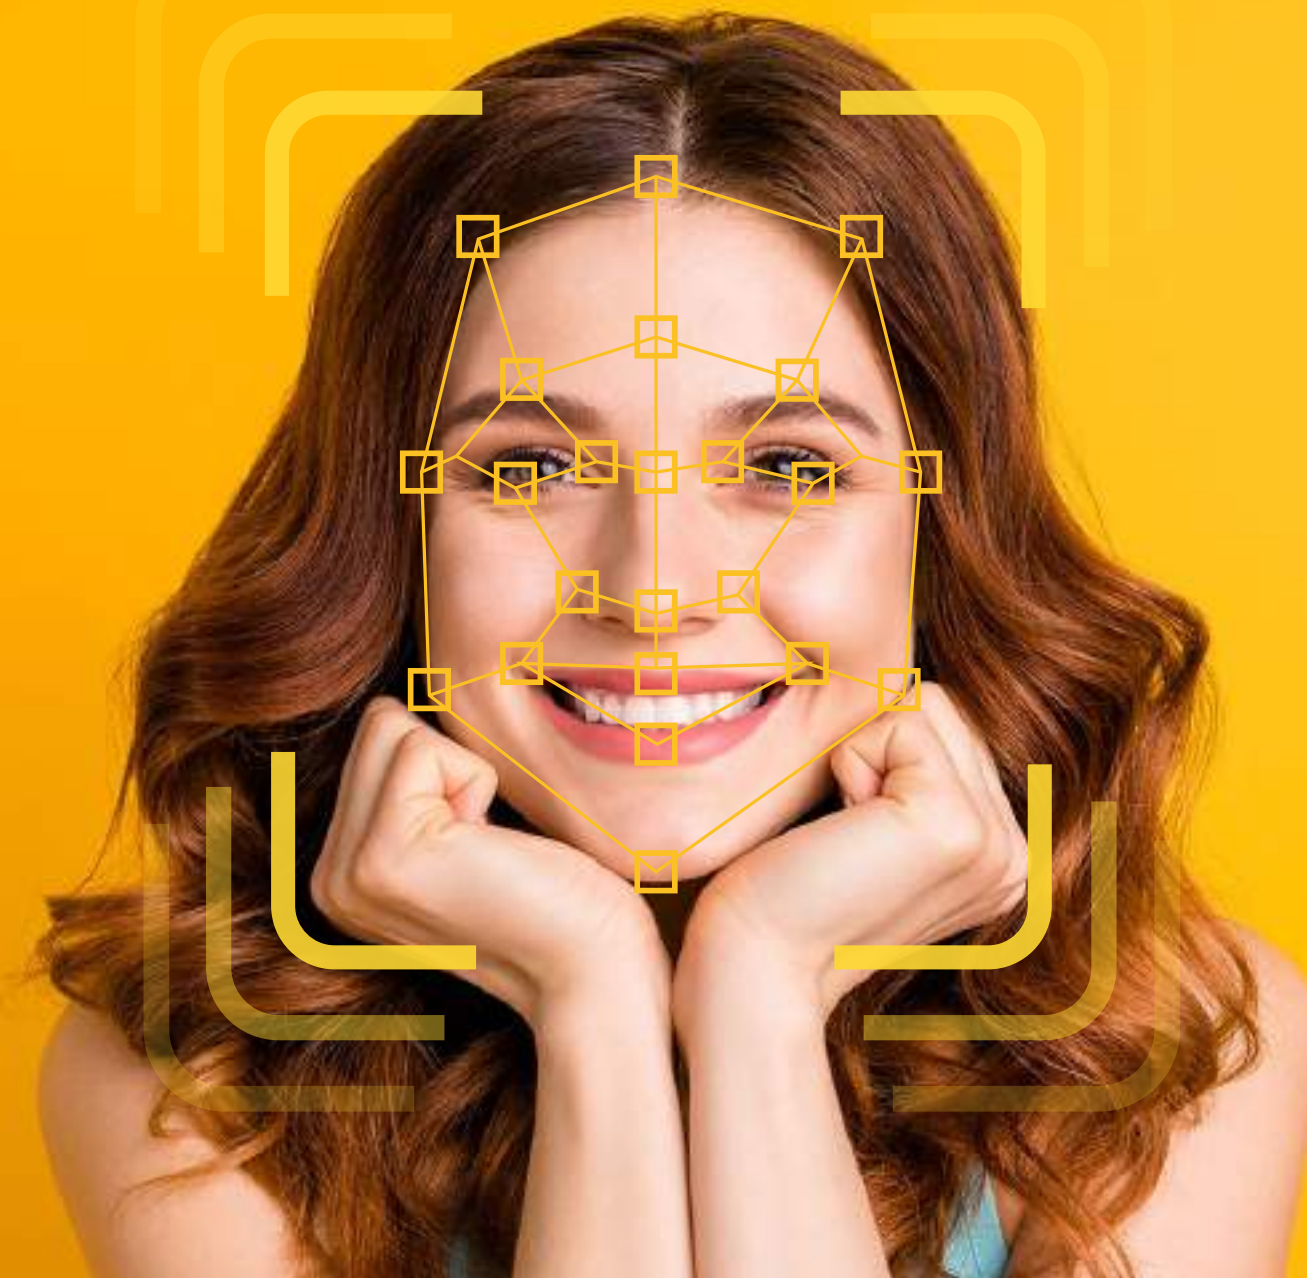

## Armatura's Identification Technology

Armatura's identification technology offers palm verification, facial verification, and mobile credential to our customers to meet various demands and needs. Facial verification is a way of identifying or confirming an individual's identity using their face. Facial verification systems can be used to identify people in photos, videos, or in real-time. Armatura's palm verification technology is revolutionizing biometric security by utilizing the unique palmprint and palm vein patterns of individuals. Mobile credentials allow users to access doors via dynamic QR codes as credentials.

## R&D Center, Designed & Engineered in Atlanta, GA, USA,

Armatura is an international provider of advanced biometric technology solutions, specializing in innovative products to enhance security and facilitate trusted identity verification. Based in Atlanta, GA, USA, Armatura delivers comprehensive Identity and Access Management solutions to diverse clients, including systems integrators, security providers, government agencies, and multinational corporations.

Armatura is located in Atlanta, Georgia, USA. The company provides comprehensive Identity and Access Management solutions to many different customers.

## Armatura's Quality-Focused Thailand Manufacturing Facility

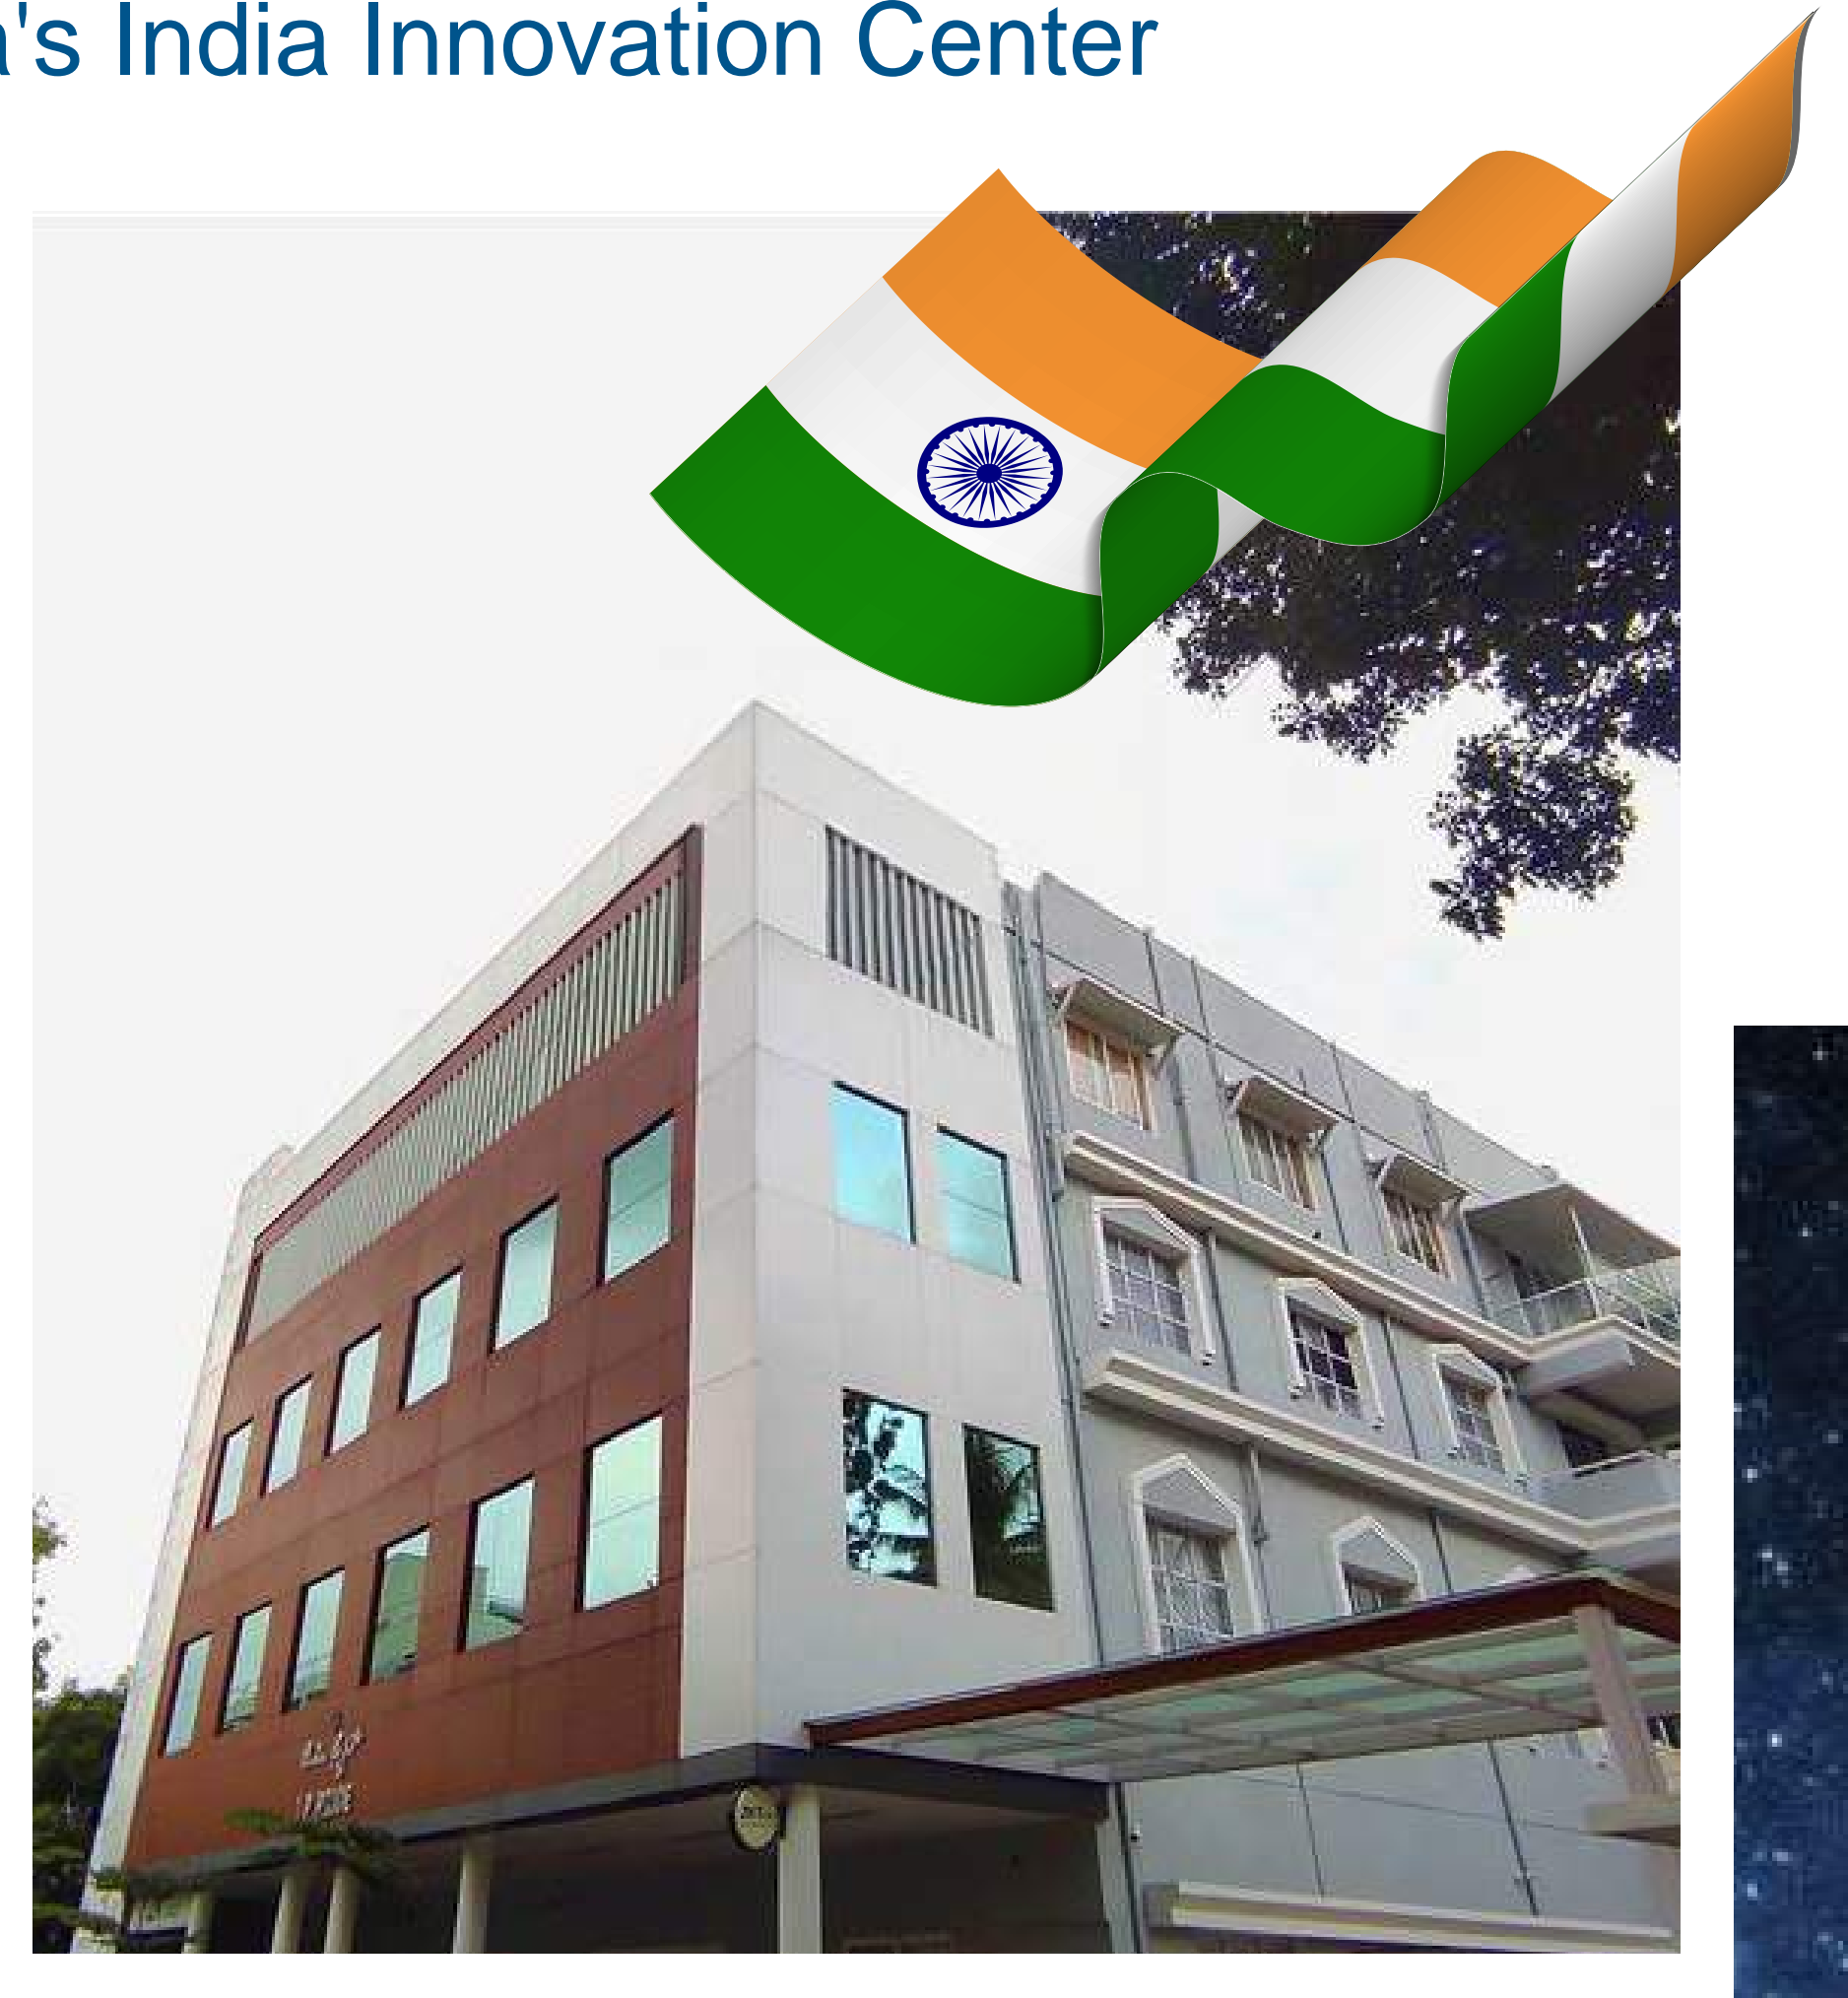

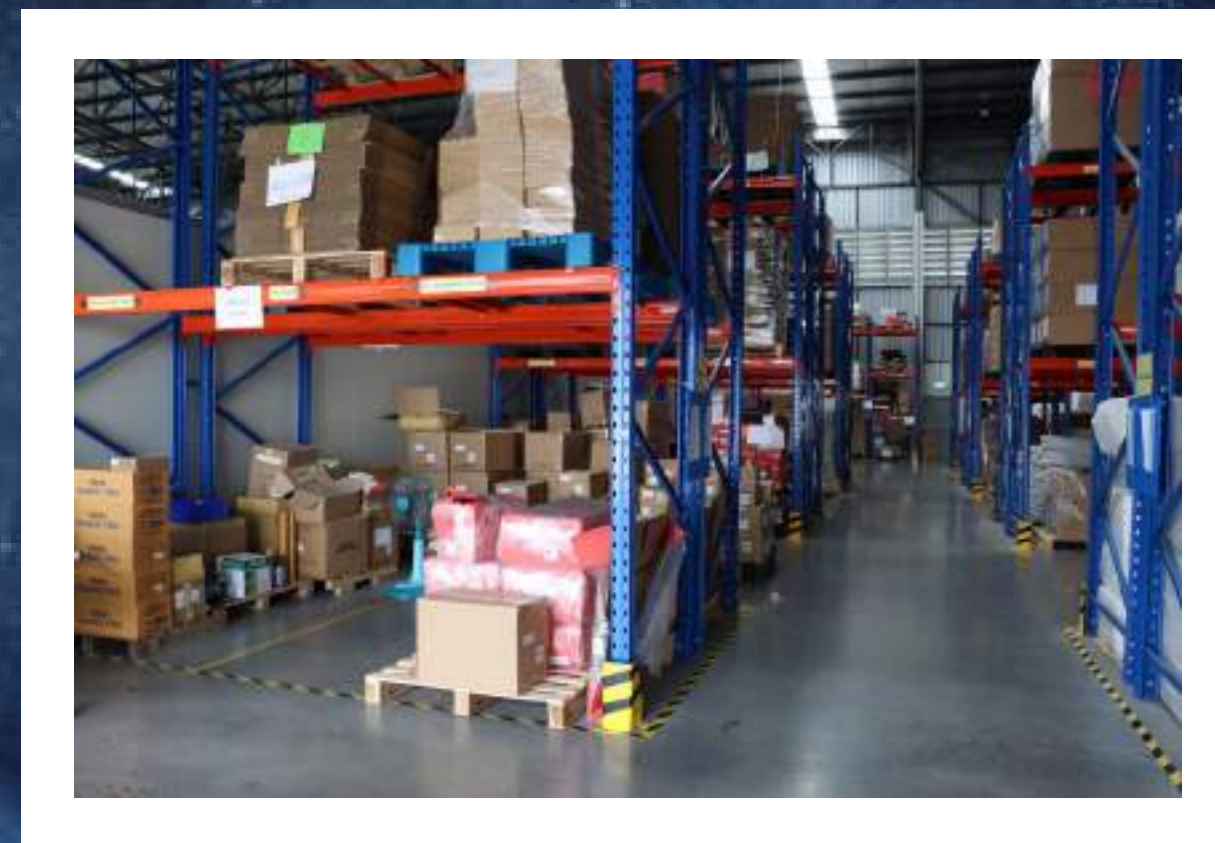

Armatura products are meticulously manufactured in Thailand, where the company maintains complete control over the entire production process. This allows Armatura to guarantee each product meets stringent quality standards and delivers exceptional performance. By overseeing manufacturing from start to finish, Armatura ensures the highest precision and attention to detail, enabling the consistent delivery of reliable, durable, and cutting-edge biometric solutions worldwide.

## Cutting-Edge Biometrics Research at Armatura's India Innovation Center

Armatura also operates a state-of-the-art research and development center in India. This Indian R&D hub serves as the epicenter of Armatura's technological innovation, driving the development of the company's next-generation biometric solutions. With a team of world-class engineers, scientists, and AI experts, the India facility explores cutting-edge advancements in areas like contactless palm verification, facial authentication, and multi-modal identity verification.

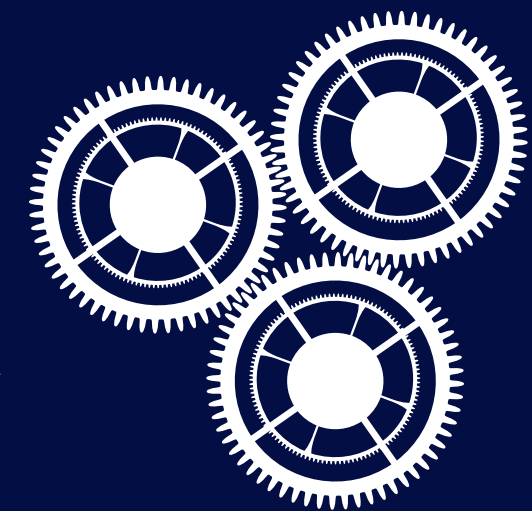

## Armatura's Open SDK Facilitates Seamless Third-Party Integrations

Armatura are also open for SDK integration to merge with third party's product. This allows Armatura to offer its cutting-edge biometric technologies as configurable solutions that can be easily integrated into a wide range of third-party systems and applications. By providing flexible SDK offerings, Armatura enables its partners to seamlessly incorporate its industry-leading identification and authentication capabilities into their own products and platforms, empowering them to enhance security, convenience, and user experiences without complex custom development.

## Armatura's Flexible Software Customization Empowers Tailored Solutions

Armatura are also open for software customization, allowing the company to tailor its biometric solutions based on the specific needs and requirements of its partners. This means Armatura can customize the user interface, functionality, and feature set of its technologies to perfectly align with the unique workflows, branding, and business objectives of each customer.

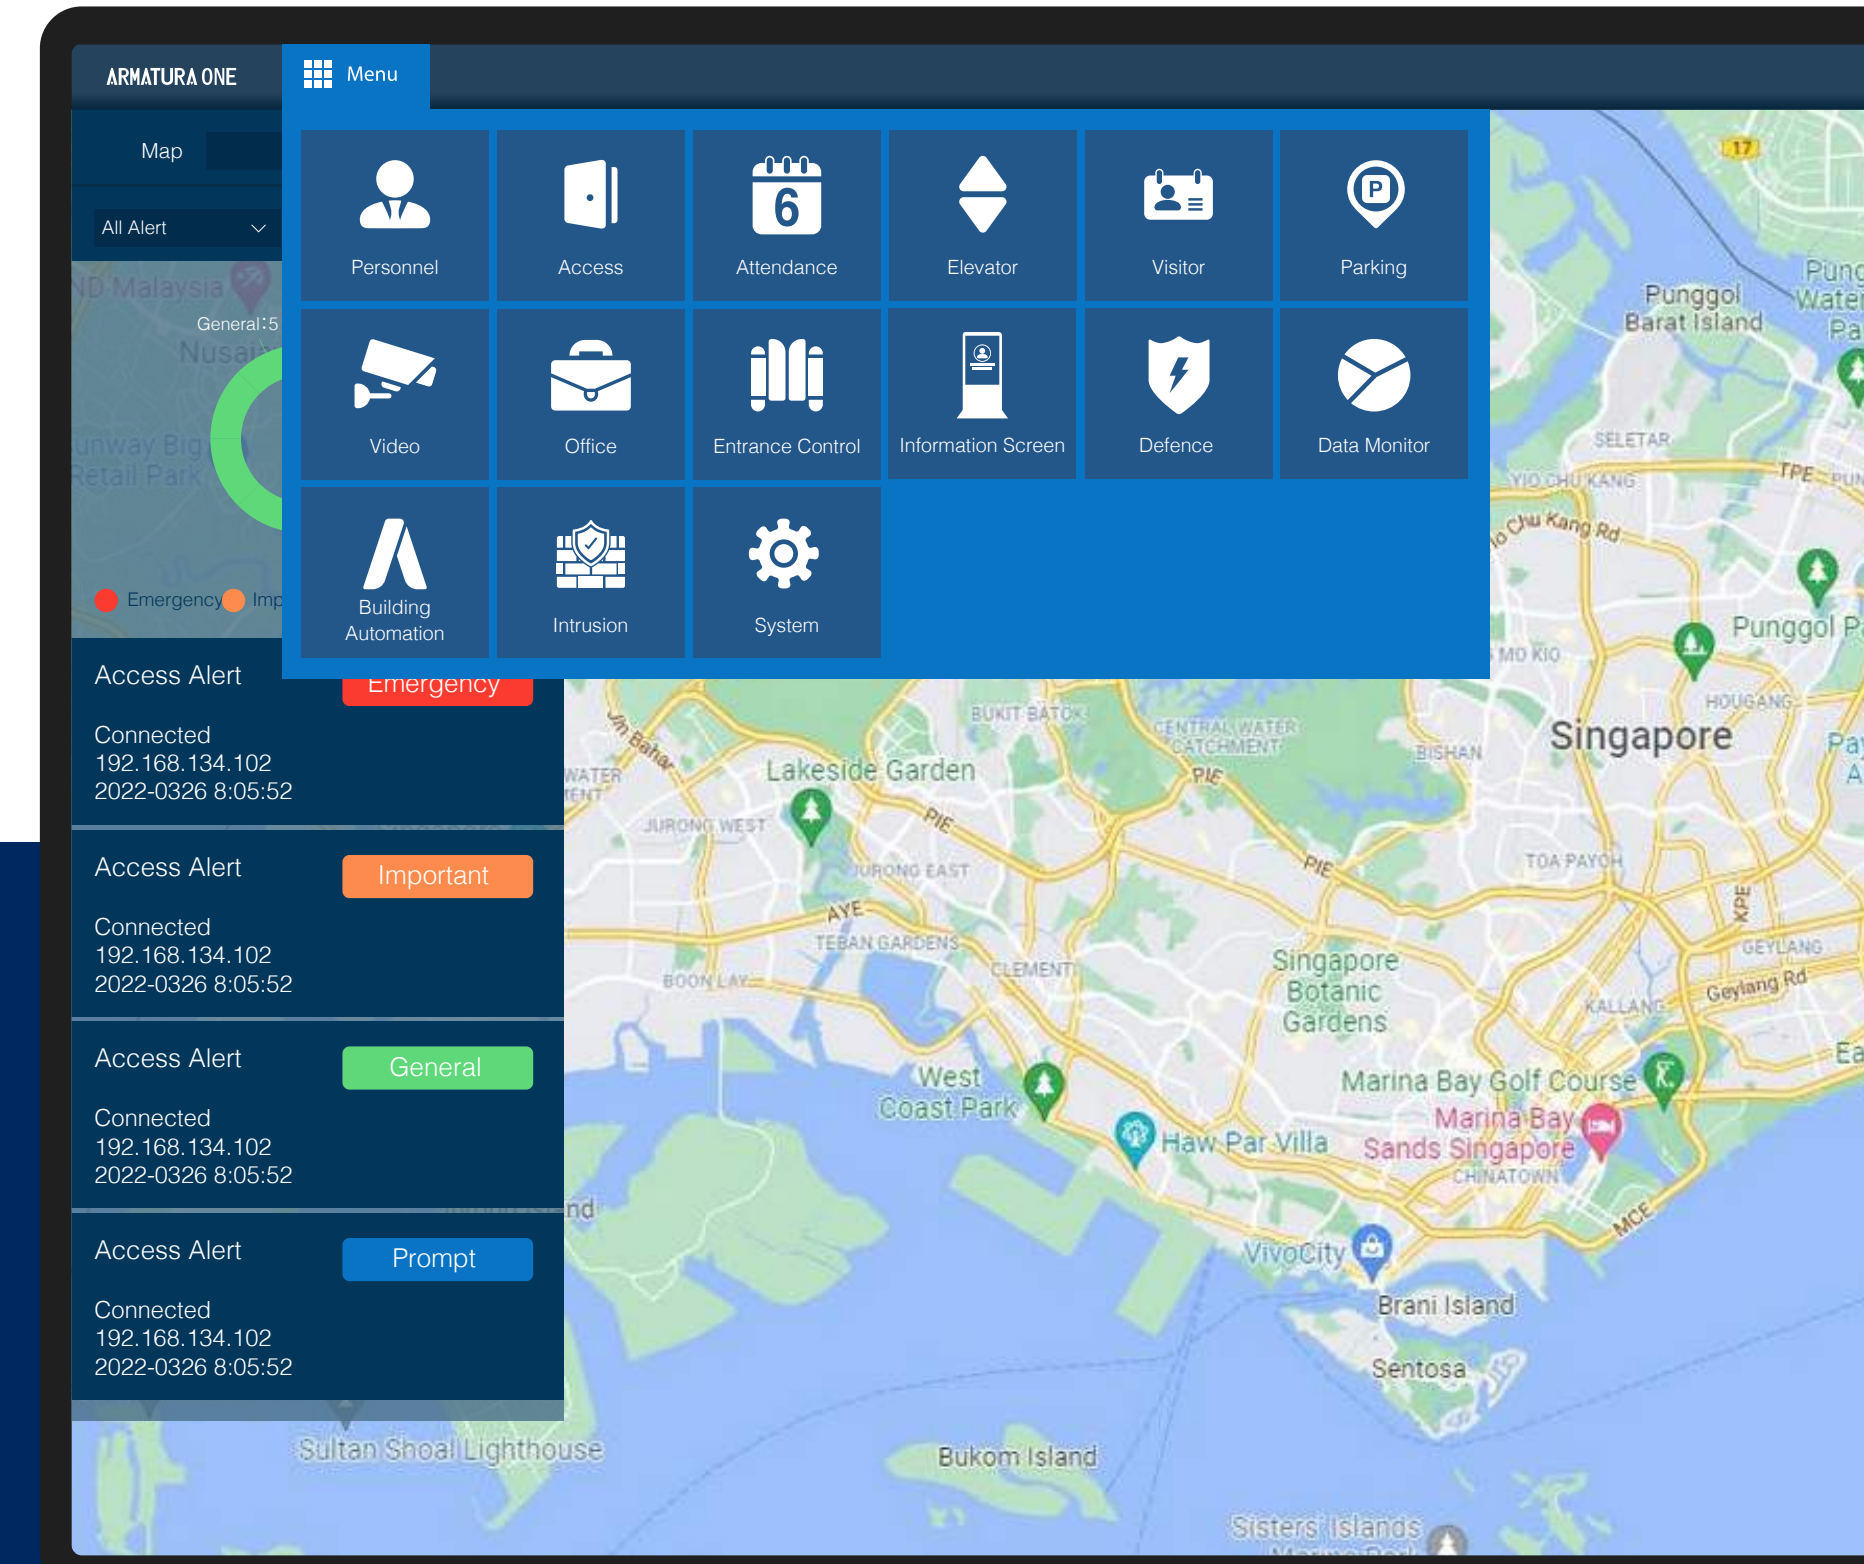

CUSTOMIZATION

A stylized, glowing blue gear icon composed of a network of lines and dots, positioned between the words "CUSTOM" and "IZATION" in the large text "CUSTOMIZATION". The background is a dark blue space with scattered white and light blue stars.

## Seamless Third-Party Integrations

Armatura's all-in-one web-based software is compatible with leading third-party platforms such as Digifort, Hanwha, and Artec. This open integration approach allows Armatura's biometric technologies to be seamlessly applied to a wide range of access control and video management systems.
